

CIS 330 Winter 2019: What is Cheating?

Please initial the following statements:

- 1) Sharing code for with another student is cheating
- 2) Sharing code for old assignments with another student is cheating
- 3) Using previous solutions on the internet is cheating
- 4) This, in particular, includes finding code on github, bitbucket, etc.
- 5) Hiring someone to do your code for you is cheating
- 6) There may be other types of cheating that aren't listed here. If you think you are in a gray area, then ask!!

You may:

- 1) Discuss your code with others (highly encouraged)
- 2) If you are the helper, you may look at the code of the person you are helping
- 3) BUT: If you are the one being helped, you **may not** look at the helper's code

If I detect collusion, all individuals involved will receive an F in the course immediately. Please note that if you are the one providing too much help, then you will also get an F.
